

QuickBuy ePad

Powered by ePipeandWire

The **QuickBuy ePad** was designed by a licensed NEC professional specifically for electrical contractors looking to dramatically improve their daily purchase process.

- ❑ Reduce the amount of time required for a customer to order via your Webstore.
- ❑ Offer all material in “electrician friendly” industry slang – the same nomenclature used when a user would email or phone in an order.
- ❑ Focus is on the most commonly used, high volume “daily” material that is purchased.
- ❑ The materials are presented based on the user’s specific scope of work – for example, when installing a 200A circuit / 2” conduit: 3/8 top side beam clamps, a 24x24x6 box, 3/0 cable, etc. are all applicable items to that type of installation. Regardless of field conditions, the majority of material needed will be offered in one list for the user to quickly select.
- ❑ A true benefit to the contractor is they remember more items to order versus opening a blank email.
- ❑ Objective is to get customers purchasing and engaged on your Webstore on a daily basis.
- ❑ Differentiate your Webstore from the competition and leverage technology to embed existing relationships in your local market before the competition does.

❑ One-Time Set-Up Fee – \$1,000.00

❑ Monthly Subscription – \$300.00

Price subject to change.
